**RETURN OF PRICES OF CROPS, LIVE STOCK
AND OTHER IRISH AGRICULTURAL
PRODUCTS.**

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the following Report on the prices in Ireland of Irish crops, live stock and other agricultural produce for the year ended 31st December, 1914.

Tables are submitted with the Report showing the average prices (1) for each of the last twenty years; (2) for the periods from 1st January to 31st July, and from 1st August to 31st December, 1913 and 1914; (3) for each month of 1913 and 1914; (4) for each week of 1914 for certain commodities. An Appendix is also included showing the prices realised for Irish, Foreign and Colonial Butters at the principal markets of the United Kingdom in each week of 1914. At the end of this publication will be found diagrams showing at a glance the variations in the average prices of Irish crops, live stock and other agricultural produce during the last twenty years, and the weekly variations in the prices of Hay, Butter and Eggs in 1913 and 1914.

The movements of the prices of each product are traced in detail later in this Report, but it is well to give at once a general idea of the state of prices in 1914, as compared with previous years for which official records are available.

The following table shows the average prices for 1914, and higher

average annual prices or the next highest average annual price since 1881 inclusive:—

	Average Price in 1914.	Higher average annual prices or next highest average annual prices since 1881 inclusive.
<i>Crops—</i>	(Per 112 lbs.)	
Wheat ...	8.8½	<i>Exceeded only in 1881, when the average price was 9/5.</i>
Oats ...	7 1½	<i>Never exceeded in period. Next highest 6/10½ in 1912.</i>
Barley ...	7.3½	<i>Exceeded in seven years in which the prices were—8/7 in 1912, 7/7 in 1882, 7/3½ in 1881, 7/4½ in 1908, 7/4½ in 1891 and 1913, 7/3½ in 1883.</i>
Potatoes ...	3.4½	<i>Exceeded in eight years in which the prices were—3/11½ in 1907, 3/9½ in 1913, 3/7 in 1891, 3/6½ in 1912, 3/6 in 1903 and 1911, 3/5½ in 1908, and 3/5½ in 1898.</i>
Hay ...	3.1½	<i>Exceeded in eight years in which the prices were—4/- in 1892, 3/9½ in 1910, 3/6½ in 1893, 3/5½ in 1909, 3/3½ in 1891, 3/2½ in 1904, 3/2 in 1911, and 3/1½ in 1912.</i>
Grass Seed ...	8/11½	<i>Prices were higher in most of the previous years.</i>
Flax ...	(Per 14 lbs.) 9/3½	<i>Never exceeded in period. Next highest was 8/8½ in 1910.</i>
<i>Store Cattle—</i>	<i>Per head.</i>	
1-2 years old	£8 16 9	<i>Never exceeded in period. Next highest £8 14s. 6d. in 1913.</i>
2-3 years old	£11 17 3	<i>Never exceeded in period. Next highest £11 12s. 3d. in 1913.</i>
Over 3 years old.	£13 14 3	<i>Never exceeded in period. Next highest £13 4s. 6d. in 1913.</i>
Springers ...	£15 4 3	<i>Never exceeded in period. Next highest £15 4s. 2d. in 1911.</i>
<i>Store Sheep—</i>		
Lambs ...	30/-	<i>Exceeded in two years—30/11 in 1906, 30/6 in 1907.</i>
1-2 years old	37/3	<i>Exceeded in seven years—44/1 in 1907, 44/- in 1906, 40/8 in 1905, 40/- in 1890, 38/3 in 1904, 38/2 in 1908, and 37/4 in 1903.</i>
Over 2 years	38/6	<i>Exceeded in eight years—44/7 in 1906, 43/8 in 1890 and 1891, 42/8 in 1907, 41/1 in 1905, 40/8 in 1904, 39/9 in 1903, and 39/4 in 1908.</i>
<i>Meat, Provisions, &c.</i>	<i>Per 112 lbs.</i>	
Beef (dressed)	63/6	<i>Exceeded in three years—67/1 in 1883, 65/10 in 1882, and 64/0½ in 1881.</i>
Mutton "	70/5	<i>Exceeded in four years—70/7 in 1883, 73/11 in 1882, 72/5 in 1884, and 70/11 in 1881.</i>
Pork "	59/9	<i>Exceeded in two years—63/7 in 1913, 60/3 in 1910.</i>
Butter ...	108/5	<i>Never exceeded in period. Next highest 108/4 in 1881.</i>
Eggs ...	<i>Per 120.</i> 9/11	<i>Never exceeded in period. Next highest 9/5½ in 1913.</i>
Wool ...	<i>Per lb.</i> 1/0½	<i>Never exceeded in period. Next highest 1/0½ in 1905.</i>

This table shows that last year our farmers received very satisfactory prices for their products. A comparative list of prices for each product, however, is not a reliable index of the position of the farmer—an increase of 9 per cent. in the price of Irish hay would only just about

compensate Irish farmers for a fall of 1 per cent. in the price of Irish pork. The results of the Census of Agricultural Production for the years 1907-8 and 1912-13 now make it possible to give to the sale of each of the farmers' products its due weight, and accordingly to arrive at general index numbers for Irish agricultural produce for each year. Taking the Irish farming community as a whole, it is roughly estimated that for every £1 worth of Grass Seeds sold by farmers, the value of Hay sold is £2; of Flax and Wool, £2 each; of Barley, £3; of Oats, £4; of Potatoes and Sheep, £7 each; of Eggs, £9; of Butter, £15; of Pigs, £18, and of Cattle, £31 (Fat Cattle bringing £20 and other Cattle, £11). Sales of Store Cattle, &c., from one Irish farmer to another are not included in these figures.

For purposes of comparison with England and Wales, for which index numbers of agricultural prices are available, and in order to lessen the danger of exceptional prices for a particular year having undue effect, the average price of each product for the three years 1906, 1907 and 1908 has been taken as a standard of comparison. Taking the average price of each product for these three years as 100, the following table shows the average for each of the years from 1909 to 1914 inclusive. The figures in brackets after each product represent the "weight" attached to that product, i.e., these "weights" represent the comparative value of the total sales.

INDEX NUMBERS OF THE PRICES OF PRODUCE SOLD BY IRISH FARMERS.

Product (and "weight").			1903 1907 and 1908.	1909.	1910.	1911.	1912.	1913.	1914.
Fat Cattle	(20)	...	100	105	109	105	100	113	115

Hay	(2)	...	100	120	130	109	109	101	108
Grass Seeds	(1)	...	100	142	123	111	112	91	82
General Index Number—									
For Ireland	...	...	100	103	108	105	109	113	114
For England and Wales	...	...	100	99	104	106	112	112	—

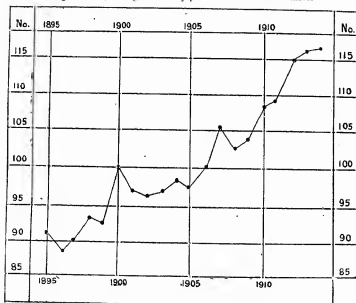

The general index numbers show that Irish farmers received in 1914 £114 for the same quantity of produce as they got £113 for in 1913, £109 in 1912, £105 in 1911, £108 in 1910, £103 in 1909, and £100 in the period 1906 to 1908. The index number for 1914 might have been expected to have been higher than 114, as compared with 113 in 1913, and the chief reason why it was not higher was due to the fall in the index number for pigs—a very heavily weighted item—from 128 in 1913 to 120 in 1914.

The comparison with the general index numbers for England and Wales shows that the interests of the Irish and English farmers are not always the same; thus while the general price for Irish produce fell in 1911 the price for British produce rose.

It must be borne in mind that although the prices for agricultural produce have increased considerably in recent

AVERAGE LEVEL
OF ALL PRICES.

years, the prices paid by farmers for feeding stuffs, seeds, manures, &c., have also greatly increased. Although it is not possible at present to calculate the index numbers for the farmers' expenses, it is of interest to notice the fall in the purchasing power of gold or, in other words, the rise in the general range of prices, agricultural and other than agricultural, which has been taking place since the year 1896. In the index numbers of the Board of Trade account is taken of the prices of forty-five principal commodities including Food Stuffs (Corn, Potatoes, Meat, Sugar, &c.), Coal and Metals, Textile Raw Materials and other commodities, *e.g.*, Timber, Bricks, &c. Each of the commodities is "weighted" according to its importance; the prices for each year multiplied by the weights are added together, and the result reduced to a percentage of the total for the year 1900. The following diagram has been constructed from the "Index Numbers" adopted by the Board of Trade, and shows at a glance the change in the general range of prices of commodities, agricultural and other than agricultural, during the twenty years 1894 to 1911 inclusive.

The "Index Numbers" for these years were—

1895—91.0	1902—96.5	1909—104.0
1896—88.2	1903—96.9	1910—108.7
1897—90.1	1904—98.3	1911—109.3
1898—93.2	1905—97.6	1912—115.0
1899—92.3	1906—100.4	1913—116.5
1900—100.0	1907—105.7	1914—117.2 (a)
1901—96.9	1908—102.8	

(a) January–July, 113.6; Aug.–Dec., 122.6.

This table shows that goods that cost £4 8s. in 1896 could only be purchased for £5 17s. in 1914. These index numbers refer to the United Kingdom as a whole. The corresponding numbers for Ireland are not available, but taken on the whole the general trend of prices over the period was probably much the same for Ireland as for the United Kingdom.

The effect of the war on the prices of Irish agricultural produce will be seen in the special table compiled for this purpose which appears on page 26. It is well to notice that in general prices were lower in the first seven months of 1914 than in the corresponding period of 1913. The downward tendency was, of course, much more than counterbalanced by the effect of the increased demand caused by the war conditions in the last five months of the year.

AVERAGE PRICES OF CROPS, LIVE STOCK, &c.

The following two tables show the average prices of (1) Farm Crops and (2) Live Stock, Meat, &c., for the two decades, 1894–1903 and 1904–1913, and for each of the years 1913 and 1914.

FARM CROPS.

Wool, . . per lb.	0 7½	0 10½	1 0	1 0½

It will be noted that the price of each item mentioned, with the exception of Barley, Potatoes, Grass Seeds and Pork, shows an increase in 1914 as compared with 1913.

I. CROPS.

Prices of Sales by farmers of the Irish Wheat Crop harvested in 1913 were recorded up to March, 1914, the average

WHEAT.

price from 1st January, 1914, to the close of the sales being 7/5 per cwt., as compared with 7/6½ in the corresponding period of 1913. The area sown was 37,000 acres in 1914, as compared with 34,000 acres in 1913, and the total yield of the grain 758,000 cwts. in 1914, as compared with 694,000 cwts. in 1913. Sales of the new grain commenced in the second week of September, and the average price to the end of the year was 9/5½ per cwt., as against 7/5½ for the corresponding period of 1913. The average price for the whole year was 8/8½ per cwt., as compared with 7/5½ in 1913.

The area sown in Ireland with Oats was reduced from 1,049,000 acres in 1913 to 1,029,000 in 1914, and the

OATS.

total yield of the grain from 18,887,000 cwts. in 1913 to 18,082,000 cwts. in 1914. The average price for the year 1914 was 7/1½ per cwt., as compared with 6/- for 1913.

Comparing 1914 with 1913 the average price of White Oats was lower in January, February, March and April,

WHITE OATS.

higher in May, June and July, and considerably higher in each of the last five months. The average price for the first seven months was below that for 1913, being 6/7½ per cwt., as against 7/0½ in 1913. The average price, however, for the last five months of the year was 8/0½,

as against 6/1 for the corresponding period of 1913, and the average for the whole year was 7/6, as against 6/5½.

As regards Black Oats, the average price for the first seven months of 1914 was also lower than for the corresponding period of 1913, being 5/10½ per cwt., as against 6/6½. The average for the last five months of the year 1914 was 6/11½, as against 5/5½ in the corresponding period of 1913, and the average price for the whole year was 6/9, as compared with 5/7 in 1913.

Irish farmers, as a rule, dispose of their Barley before the end of December. The average price realised last season was slightly lower than in the previous year, being 7/3½, as against 7/4½ per cwt. in 1913. Last year's price, however, was only exceeded in two of the twenty-one years from 1892 to 1912 inclusive.

The total yield of Irish Potatoes last year was 3,446,000 tons, as compared with 3,739,000 tons in 1913. The price realised in each of the first six months of 1914 was considerably lower than in the corresponding months of 1913. There was but a slight difference in the prices for July, for August, for September, and for October of each of the two years, but the prices in November and December last were considerably higher than in the same months of 1913. The average price for the first seven months was 3/5 for 1914, and 4/3½ for 1913, the average for the last five months of 1914 was 3/4, as against 3/1½ for the same period of 1913. The latter increase was not sufficient to counterbalance the decrease in the first part of the year, with the result that the average price for the whole year was only 3/4½ per cwt., as compared with 3/9½ in 1913.

The annual value of the Hay crop of Ireland is very large, but the quantity sold is very small compared with what is grown. The price realised in January, 1914, was slightly higher than in January, 1913, but the average price for each of the succeeding months up to and including July was lower than for the corresponding month of 1913. The average price for August and for each month to the end of the year was considerably higher than in the corresponding month of 1913. The average price for the first seven months was 2/10½ per cwt., as against 3/1 for the first seven months of 1913, but the average for the last five months was 3/6 per cwt., as compared with 2/9½ for the corresponding period of 1913. The average for the whole of last year was 3/1½, as against 2/11½ in 1913. These prices refer to Hay of all kinds; corresponding prices for Clover Hay and for Meadow Hay are shown in the tables.

Sales of Irish Grass Seeds by farmers are recorded from August to February inclusive. The average prices for January and February of 1914 were much below those for the same two months in 1913, and also the average prices in August, September and October were much lower than in those months in 1913. The price in November last,

however, rose sharply to 10/6½ per cwt., as compared with 9/6½ in 1913, and in December to 13/6, as against 8/9 in 1913. The average for the whole of 1914 was 8/11½, as against 9/11 in 1913.

The area under Flax in Ireland decreased from 59,000 acres in 1913 to 49,000 acres in 1914, and the total yield of scutched fibre from 2,024,000 stones in 1913 to 1,300,000 stones in 1914. Prices are

FLAX.

recorded from September to February inclusive. The prices in January and February, 1914, were much below those for the same months of 1913, the average for the two months being 6/9 per stone in 1914, as against 8/3½ in 1913. Prices in each of the last four months of 1914 were very much higher than in 1913, the average for the period being 11/6½ in 1914 per stone, as against 6/7½ in 1913. The average for the year 1914 was 9/3½ per stone, as against 7/2½ in 1913.

II. LIVE STOCK AND OTHER PRODUCTS.

The prices of Fat Cattle were considerably lower in the first seven months of 1914 than in the corresponding period of 1913, being in the Dublin market

FAT CATTLE.

61/9 per cwt. (dead weight), as against 64/9. The price in April, 1914, in Dublin was only 57/-, as against 68/3 in April, 1913. The prices for the last five months of the year were, however, more than sufficient to compensate for the lower prices in the previous seven months, being 64/9 per cwt. in 1914, as against 59/6 for the last five months of 1913, with the result that the average for the whole year at Dublin worked out at 63/6 per cwt. for 1914, as against 62/5 in 1913. The increase was most marked in December, 1914, when the price was 70/-, as against 60/6 in December, 1913.

The average prices for the year 1914 of Store Cattle from six to twelve months, from one to two years old, of

STORE CATTLE.

two to three years old, and of three years old and over were higher than for 1913. The averages for the first seven months of 1914 were higher for Store Cattle six to twelve months old and for three year olds, but slightly lower for Cattle one to two years old than in the first seven months of 1913, and exactly the same as regards two year olds. Each of the five descriptions of Store Cattle realised higher prices in the last five months of 1914 than the same period of 1913.

The average price per cwt. of Fat Sheep sold in the Dublin Market was considerably higher in each of the first

FAT SHEEP.

three months of 1914 than in the corresponding months of 1913. Prices then fell considerably below the prices for 1913 for each of the four months April to July inclusive. In August, September, October and November prices were again higher than in 1913, but in December they were again slightly less. The average price of Fat Sheep at Dublin was 74/6 per cwt. (dead weight) for the first seven months of 1914, as against 73/6

for the same period of 1913, and 66/6 for the last five months, as against 64/9 for the same months of 1913; the average price for the whole year 1914 worked out at exactly the same as for 1913—70/5 per cwt. dead weight.

The average prices of Lambs in April and May of 1914 were lower than in April and May of 1913, in July and August the prices were exactly the same in the two years, and in each of the other eight months the prices in 1914 were higher than in 1913. The average price for the first seven months was 29/3 for 1914, and 28/6 for 1913; and in the last five months 30/3 for 1914, as against 28/3 for 1913; the average for the whole year was 30/- for 1914, as compared with 28/6 for 1913.

The average price of Store Sheep, one to two years old, was lower in March, in June and in November of 1914, than in the corresponding months of 1913, but was higher in each of the other nine months. The average price of Store Sheep two years old and over was lower in March and in November of 1914 than in those months of 1913, but higher in each of the other ten months. The average price for the first seven months of 1914 was 38/- for Store Sheep, one to two years old, and 35/- for Store Sheep two years old and over, as against 37/6 and 32/-, respectively, for the first seven months of 1913. The average price for the last five months of 1914 was 36/6 for Store Sheep one to two years old, and 38/9 for the two year olds and over, as against 35/9 and 36/9, respectively, for the last five months of 1913. The averages for the year 1914 were—one to two year olds, 37/3; two year olds and over, 38/6, as against 36/9 and 36/6, respectively, for 1913.

The number of Pigs cured by the principal Irish Bacon Curers in 1914 was 1,277,000, as compared with 1,181,000 in 1913. The numbers exported alive decreased from 200,000 in 1913 to 148,000 in 1914. The average price per cwt. of Pork which, in 1913, had reached 63/7 (the highest average recorded since these statistics were first compiled in 1881) decreased to 59/9 in 1914. The average price per cwt. for the first seven months was 59/9, as against 64/6 for the corresponding period of 1913, the average for the last five months was also 59/9, as against 62/6 for the last five months of 1913.

The average price in Ireland of all kinds of Irish Butter worked out at 108/6 per cwt. in 1914, as compared with 103/- in 1913. For the first seven months of the year it averaged 102/6, as against 102/3 for the same period of 1913, but for the last five months the average rose to 115/3, as compared with 104/- for the last five months of 1913. The price of Creamery Butter was lower in each of the four months March to June inclusive than in the corresponding months of 1913, but higher in each of the other eight months. The average for the first seven months was 107/-, as against 107/3 in 1913, and for the last five months 123/6, as against 114/- for the corresponding period

of 1913. The average price for December was 135/10 per cwt., as against 127/1 in December, 1913. The average price of Creamery Butter for the whole year was 114/9, as against 110/4 for the year 1913. Corresponding particulars for farmers' butter and factory butter are shown in the tables on page 61. These are the prices received for Irish butter in Irish markets. Prices for Irish, Foreign and Colonial butters at English markets appear in the Appendix.

Irish Eggs in Ireland fetched on an average 9/11 per 120 in 1914, as against 9/5½ in 1913 which was higher than any annual average previously recorded. The average price was higher in every month of 1914, with the exception of July, than in the corresponding month of 1913, closing in December with an average of 18/9½ per 120, as against 15/8½ in December, 1913. The average for the first seven months of the year was 8/9½, as against 8/6 for the same period of 1913, and 13/5½ for the last five months, as compared with 12/0½ for the same period of 1913.

The average price of Irish Wool in Irish markets in 1914 also exceeded all records for previous years. It averaged 1/0½ per lb., as against 1/- in 1913. For the first seven months of the year the average was a point less than for the same period of 1913, being 1/0½, as against 1/0½, but in the last five months the average rose to 1/1½, as against -/11½ per lb. in the same period of 1913.

In the tables of comparative annual average prices which follow this Report, figures for each of the last twenty years are given. Official records, however, go back to the year 1881, and unofficial figures for earlier years will be found in the Department's Return of Prices for the year 1906-7, in which the main changes that took place in prices have been traced for the previous sixty years.

I have the honour to be,

Sir,

Your obedient Servant,

THOMAS BUTLER,

*Superintendent of Statistics and
Intelligence Branch.*

NOTE.—Prices of Perennial and Italian Rye Grass Seeds were not separately recorded in 1885 and 1890.

TABLE VII.—FLAX. Prices per 14 lbs.

(See Diagram VII.)

(The "Highest" and "Lowest" prices shown in this Table previous to 1905 are the averages, for each year, of the highest and lowest prices reported in each month. In 1905 and following years "Highest" and "Lowest" represent the actual highest and lowest prices officially reported during the year.)
